

BARTŁOMIEJ DADEJ

ABOUT ME:

I am a second-year Computer Science student at the University of Entrepreneurship and Administration in Lublin, specializing in Web Technologies and the Internet of Things. I create projects to develop my skills and knowledge—some of which are available on my GitHub. Currently, I am learning React.js and Node.js to expand my expertise in modern web technologies. I focus on both frontend and backend development, utilizing tools like Figma and AEM (Adobe Experience Manager), and working with databases such as MongoDB, PostgreSQL, and MySQL. I also have foundational experience in Java and Spring Boot. I am highly motivated to learn and quickly adapt to new technologies.

CONTACT INFORMATION:

Phone: 699199101
